Create a game of solitaire using JavaFX.

For those who do not know how to play solitaire, watch this video:
https://www.youtube.com/watch?v=0NSnp0hyA8g

Each group should have 3-4 members only.

Requirements:
- has a new game function
- has a high score function (high score should have 10 default entries)
- exit function
- you can have a waste pile of 3 cards at a time or 1 at a time

Scoring system

Move	Points
Waste to Tableau	5
Waste to Foundation	10
Tableau to Foundation	10
Turn over Tableau Card	5
Foundation to Tableau	-15
Recycle waste when playing by ones	-100

Note: Score cannot be less than 0.
